Redaksionele Kommentaar

Dit is met weemoed in ons hart dat ons ***RAUCUR*** se titel verander het na ***HEALTH SA GESONDHEID***. Julle sal ook opmerk dat ons die redaksionele komitee verander het en begin om lede van ander dissiplines betrokke by gesondheidsdienslewering te betrek. Die rede vir hierdie verandering is dat ons graag wil voldoen aan die vereistes vir akkreditering van hierdie tydskrif. Daarom is dit belangrik om bewys te lewer van die tydskrif se geloofwaardigheid.

Ons wil verder ook twee wense uitspreek oor die tydskrif se moontlike bydrae tot wetenskapsontwikkeling. Eerstens hoop ons dat die tydskrif sal bydra tot interdissiplinêre wisselwerking en samewerking deur navorsing van gesondheidsberoepsgroepe met die oog op die uitbou van 'n relevante en effektiewe gesondheidsdiensleweringstelsel in Suid-Afrika. Tweedens hoop ons dat die tydskrif die ontmoeting en kritiese toetsing van insigte en kennisuitsprake vanuit verskillende dissiplines wat betrokke is by gesondheidsdienslewering sal fasiliteer.

Editorial Comment

It is with sadness in our hearts that we changed ***RAUCUR's*** title to ***HEALTH SA GESONDHEID***. You will also notice that we changed the editorial committee and have started to involve members of other disciplines involved with health service delivery. The reason for these changes is that we really want to meet the requirements for this journal to be accredited. It is therefore important to show evidence of the journal's credibility.

We also want to voice two wishes for the journal's possible contribution to the development of science. In the first instance we hope that the journal will contribute to the interchange and co-operation between health professions through research to develop a relevant and effective health service delivery system in South Africa. Secondly we hope that this journal will facilitate the meeting and critical testing of insights and viewpoints on knowledge from the different disciplines involved with health service delivery.
